MEMORANDUM FOR THE DIRECTOR OF CENTRAL INTELLIGENCE

SUBJECT: Progress Report of the Executive for Inspection and Security for the Month of April 1948.

I. PROGRESS FOR APRIL

A. Status of Security within CIA

1. Security violations for the month of April numbered 13, the lowest number recorded since statistics of this type have been maintained. Ten of the 13 violations occurred in two office areas--OIS and OSO. The security situation continues on a very favorable plane in that during the month of April 70 complete inspections were carried out by the night duty security officers. This represents comprehensive coverage and indicates that the employees are fully aware of their responsibilities for the safeguarding of classified material.

2. The Executive for I & S has received authority to establish a CIA Investigative Unit within I & S for the investigation of personnel cases. It is anticipated that the organization will begin to function on August 1. Organizational work has been initiated and a nucleus of trained investigators has been set up for implementation of the program. This will resolve a rather serious situation which developed as a result of the FBI withdrawal of its investigative services on 1 January 1948.

3. The program for the establishment of a separate guard force for all CIA buildings has been approved and negotiations are now in progress with Department of Interior for implementation of this program. The establishment of a separate guard force of high caliber personnel will greatly increase the efficiency of the guard organization and the security of our building operations. Direct control over the guards is a principal feature of this program, which will eliminate the conflicting jurisdictions that exist in the present guard force.

4. Negotiations with the Civil Service Commission for the compliance by CIA with the Federal Loyalty Program have been conducted and an understanding with the Commission has been established wherein CIA will meet the requirements of the Loyalty Program to the greatest extent possible consistent with our security requirements for the protection of intelligence sources of information.
